Don't stay late. Bring your lap top home and monitor. I'll do the same. Hopefully it won't be a midnight posting again. Can you send me the updated list ?

I guess we'll tag team tonight on whatever needs to go out.
I'm hoping to make it in tomorrow but I'm staying plugged in.

Subject: Questions on Gold King

1.) Is there a conference call expected today? If so, what are the details?

2.) In yesterday's conference call, someone mentioned that the plume is still in New Mexico. How do we know that? How do we reconcile that with initial reports that the tip of the contamination was to reach Utah over the weekend, or by Monday at the latest? I requested an opportunity to ask that question on yesterday's conference call but was not called on. It's also a question that's been puzzling the Utah water-quality people too.

Thanks for any help you can provide.
